PRECAST SUPPLIER

EQUIPMENT INSTALLER

CHALLENGE:

Bristol Group was challenged with the design and construction of a hazardous manufacturing facility. The facility contained combustible dust and flammable liquids that create a slurry used in the manufacturing of electric vehicle car batteries. ANP Enertech called on Bristol Group to design and build a new state-of-the-art electric battery components manufacturing plant.

BRISTOL GROUP SOLUTION:

Bristol Group worked closely with the local code officials to determine the safest way to store the hazardous material. Architecturally, Bristol Group was charged with developing a new concept that conveyed the quality and integrity of the ANP Enertech brand. Precast concrete was used for the exterior walls, which ensures the longevity and quality of the building.

CLIENT IMPACT:

The result was a highly-functional and aesthetically pleasing facility with 65,000 SF of safe and clean manufacturing and office space. Meeting the accelerated schedule, while maintaining the highest quality.
